PROJECTS

E-Alumni

- Full-Stack Development: Built an E-Alumni platform leveraging Node.js, Express.js, MongoDB, React, JavaScript, CSS, Bootstrap, and HTML.
- Feature Implementation: Integrated secure authentication, alumni profiles, real-time chat (audio, video, and screen sharing), post creation, user feedback, donation portal, and helpbot functionalities; used robust authorization protocols and Cloudinary for image management.
- Demo: Check it out.

Wanderlust

- Full-Stack Development: Created a travel platform using Node.js, Express.js, MongoDB, JavaScript, CSS, Bootstrap, HTML, and Cloudinary to enable users to explore, plan, and share travel experiences.
- Core Features: Implemented seamless signup, secure login, robust authorization, and server-side validation for a smooth user experience; integrated Mongoose for effective database management.
- Hosting & Scalability: Deployed on Render.com to ensure reliable performance and scalable infrastructure.
- Demo: Check it out.

MessageMate

- Real-Time Chat Development: Built MessageMate, a chat application with Node.js, Express.js, MongoDB, and Socket.io, enabling real-time communication.
- Key Features: Implemented secure authentication, one-on-one and group chats, message notifications, emoji support, and image sharing, with robust encryption for data privacy.
- Demo: Check it out.
